Re: NWP&C Information

Dear Mr. Sainsbury:

This letter transmits the water level information we obtained on 6-14-92 at the Northwest Pipe and Casing Site (NWP&C). You also inquired about a nearby site, Precision Castparts. There are several locations of Precision Castparts (PCP). We do not have any information in our site assessment files, however, the RCRA files show two PCP facilities near NWP&C, except not on Lawnfield Road. I have included their generator and the latest manifest form from the file.

If I can be of any other assistance, please feel free to call me at (503) 229-6568.

Sincerely,

Brian McClure, Project Manager

Memorandum

Date: August 12, 1992

To: John Sainsbury, EPA
From: Brian McClure, DEQ
Subject: NWP&C Information

Attached are two figures that depict the surface elevations at the well locations (Figure 1) and the water levels (Figure 2). These figures are based on the casing and surface elevations found on the Listing Site Inspection well logs for monitoring wells (#1-7) found at the site.

This information is summarized as follows:

There was one discrepancy on boring log MW7, the casing elevation is incorrectly listed as 119.10 ft. and the surface elevation is 107.00. We assumed the 107.00 was accurate and measured the top of casing from ground surface at 109.43. Subsequently the water level is measured from this point.
